ABOUT ME

Hands-on experience in building scalable ETL pipelines, cloud data architectures, and BI solutions. Proficient in **Microsoft Fabric, Azure Data Lake, PySpark, SQL, and Power BI**, with a strong foundation in data modeling, query optimization, and automation. Skilled in transforming raw data into business-ready insights using **medallion architecture** (Bronze, Silver, Gold layers) and **fact/dimension modeling** to enable accurate and timely reporting. Part of daily client calls to discuss requirements and provide updates on data solutions.

WORK EXPERIENCE

ProcDNA Analytics Limited, Gurugram

Apr 2024 - Present

- **Data Engineering (Fabric & Azure):**
 - Built end-to-end data pipelines in Microsoft Fabric connecting to Azure Blob Containers for ingestion, transformation, and storage.
 - Implemented medallion architecture (Bronze → Silver → Gold) for structured data processing.
 - Developed fact and dimension tables in Silver layer and curated datamarts in Gold layer for reporting.
- **ETL Development:**
 - Designed and optimized PySpark and SQL scripts to transform raw and staged data into analytics-ready datasets.
 - Applied incremental loading, deduplication, and data quality checks for consistent outputs.
 - Automated pipeline orchestration in Fabric, improving refresh cycles and reducing processing time by 40%.
- **Data Modeling & Optimization:**
 - Standardized business logic in SQL views and semantic models for KPI reporting.
 - Optimized large-scale transactional data queries using CTEs, indexing, and window functions.
- **Business Intelligence & Reporting:**
 - Integrated Gold layer with Power BI dashboards, enabling dynamic reporting for leadership teams.
 - Developed executive dashboards for TRx, Calls, Targets vs Non-Targets, Roster Mapping, with drill-down and parameterized views.
- **Automation & Documentation:**
 - Automated recurring report generation using VBA and SQL, reducing manual effort.
 - Documented data flows, transformation logic, and dashboard specs for audit readiness and team handovers.

SKILLS

Data Engineering & Cloud: Microsoft Fabric (Data Factory, Lakehouse), Azure Data Lake Storage, PySpark, Delta Lake

Data Warehousing & Modeling: Medallion Architecture (Bronze/Silver/Gold), Fact/Dimension Modeling, ETL/ELT

Databases & Querying: SQL (Advanced SQL, Window Functions, Optimization)

Business Intelligence Tools: Power BI, Tableau, DAX

Automation Scripting: Python (Pandas, PySpark), VBA, Excel

CERTIFICATION

- | | |
|----------------------------------|---------------------|
| • Tableau Desktop Specialist | Sep 2024 |
| • Python basics for Data Science | May 2022 – Jul 2022 |
| • C++(Ducat) | Apr 2021 – Aug 2021 |

EDUCATION

KIET Group of Institutions (AKTU)
B-Tech in Information Technology **85%**

Delhi, NCR
Oct 2020 – Jun 2024

Shree Thankurdwara Balika Vidhyalaya (CBSE)
12th Board - **97%**

Ghaziabad
Mar 2019 – Apr 2020

10th Board - **95%**

Mar 2017 – Apr 2018

INTEREST

- Following my passion for teaching, I started YouTube Channel - [Engineer Being](#), where I make educational content on Engineering.
